Computer Running Slow??

Upgrades

Is your laptop or desktop running slow?

The most common reason for this is that the machines hard drive faults it.

Your hard drive is the central repository of your Data and can slow your computer down. Also, we have progressed from mechanical harddrives to solid-state harddrives which are much faster, quieter and generate less heat. Viruses and hardware components can also have an effect

We can upgrade/replace most drives from Mechanical to Solid State hard drives [Read More](#)

Onsite and Workshop Business IT Solutions

PC Service Centre Ltd

COLOMBO STREET WORKSHOP

PC Service Centre Ltd

Our workshop is located at 289 Colombo Street in Sydenham Christchurch and is set up for all IT issues that can occur with laptops and desktops. We can advise on all hardware and have access to all major brands of I.C.T equipment.

ONSITE VISITS

It can be very frustrating having to bring your machine to our workshop. Even taking your computer back home and having to plug the right cables into the correct ports again can be an issue.

So let us take care of it. Onsite visits can be arranged by the team at our Workshop [Contact us](#)

PC Service Remote Assistance

PC Service Centre

Computer Repairs and Upgrades | All makes all models

<https://pcservice.co.nz>

When it just needs to work and there is still an active internet connection to the machine, with your approval, we have the ability to remotely log onto your machine. We can then endeavour to fix the issue on the spot.
